Foshan Shunde Kunyu Greenhouse Engineering Co., Ltd 's Greenhouse Panda Film is utilized in developing territories, this is a waterproof poly film that is dark on one side and white on the other. The Greenhouse Panda high contrast film - or light hardship nursery cover - functions admirably as an intelligent film (mirrors 90% of the light back to the developing region) or as a room segment.

Splendid white layer guarantees greatest light reflectivity to help in vegetable yield creation.

Gives most extreme control when utilized as a power outage window ornament for your yields.

Nursery power outage film reflects warmth and cools better compared to conceal fabric.

This high contrast poly film is planned explicitly to withstand the mileage of either pedestrian activity or retractable drapery frameworks, so that crop the executives control isn't diminished in these higher-stress applications.
