Prkruti air quality app gives you the real-time air quality tracking by the standard AQI format with the unique colour code. Prkruti smart algorithm notify when to wear mask, when to perform outdoor activity. App helps to identify the pureness of the air. This is the **best weather app for Android**. It can be used for AQI calculation, Air quality index by city. And, also we can use to check air pressure weather with real time weather app. It can be used for agriculture, air quality monitoring, data science and smart city solutions.
