Based in Richardson, Texas, on the Chase Bank building's tenth floor, 3T Pro Inc provides hourly and managed computer support and IT services to various businesses in Dallas, Fort Worth, and surrounding areas. Some of our clients are in architecture, interior design, manufacturing, financial services, and accounting. Others are business consultants or are involved in food services, medicine, law, and oil and gas. Along with offering uninterrupted service, onsite support, and a 24/7 help desk, we can also assist you with IT strategy and cloud services. We will craft a plan to keep your business profitable and improve your productivity by tailoring CloudConnect, our comprehensive cloud-based data server infrastructure, to suit your business type and size. Additionally, we can help you with disaster recovery, security and monitoring, web and email hosting, and equipment procurement. We have been in business since 1992 and are the authorized dealers for Lenovo and Hewlett Packard. We can provide you with desktop, laptop, and server hardware and solutions. We also have the skills and knowledge to support, guide, and implement an efficient [IT support](#) system spanning the entire network. After our skilled systems engineers identify your IT goals and discover your infrastructure, they will work with project leaders to customize an IT plan to suit your budget. Furthermore, they will provide technical support and ensure that your business continuity won't get impeded by system interruptions or excessive downtime. By resolving any issues that might arise and keeping your business systems running, we can help your business stay profitable. Find out more about our business IT support services at <https://3tpro.com/our-services/disaster-recovery-plans/> & https://3tpro.com/our-services/cloud_services/.
