Amaz offers all-natural, nutrient-rich, and plant-based elixirs made from superfoods and herbal extracts that we ethically source from agroforestry systems in the Amazon rainforest. Valued for centuries by shamans and healers for their life-giving properties, these ingredients can detoxify your body, strengthen your immune system, and relax your nervous system. Every time you feel tired, refresh, and revive yourself with our Rainforest Renew, Tropical Boost, and Floral Relax drinks. Alongside water, apple juice, Cupuaçu puree, and dried Camucamu, these natural energy drinks contain other energy-boosting ingredients. Rainforest Renew contains Suma root, also known as Brazilian Ginseng, and spirulina, a nutrient-rich superfood that can boost your energy levels, cleanse your blood, and enrich your immune system. It also contains Graviola puree, Caja puree, and ginger extract. The natural caffeine drink, Tropical Boost, contains Guarana extract, a stimulant and energy booster that can improve mental and athletic performances, and Catuaba bark extract, which is a strong tonic for strengthening overall body function. It also has Caja puree, banana puree, dried beet, and green coffee extract. Floral Relax has passionflower extract, passion fruit puree, and Mulungu bark extract, which have sedative, soothing properties. The vegan beverages are available in 296 ml bottles in packs of six on our website. We donate two percent of our sales to the Xingu Seeds Network. Aside from promoting reforestation and agroforestry, the Network provides a livelihood to the indigenous people of the Brazilian Amazon. For more information about our natural detox drinks, please visit us at <https://liveamaz.com/story> & <https://liveamaz.com/blog-custom>.
