Artificial limbs Expert Dr. V.J.S. Vohra, Senior Consultant, is in this profession since 1973. Dr. Vohra fits high tech Artificial Arms and [Artificial Legs](#), using component parts of Otto Bock of Germany, who are global leaders in this field. All types of artificial limbs are available to suit the patient's needs. South Africa's Oscar Pistorius made history when he became first double amputee to compete in an athletic event at Olympics 2012 in London, and he went upto semi finals, running on his both [artificial legs](#)! Initially banned from international competition on the plea that the artificial legs gives him extra advantage over the abled bodied athletes, Oscar appealed against the ruling and became the first amputee to compete in Olympics. Heinrich Popow won gold in London 2012 paraolympics with Otto Bock prosthesis, which enables an athlete with above knee amputation to use treadmill and take part in sports involving running, long jump, high jump and javelin.

Otto Bock Products are most popular in the world and has a worldwide presence in large number of countries. Otto Bock artificial limbs are available to fulfil the needs of all patients with professional clinical management.
