Established in 1997, Ashirwad Hospital & IVF Center has been a beacon of healthcare excellence in Indore. Founded by Dr. Mangla Athavale and her husband Hemant Athavale, the hospital has always stood for compassionate care and cutting-edge medical services.

In 2020, a new chapter began at Ashirwad Hospital & IVF Center as Dr. Rashmi Hedau assumed leadership.

At Ashirwad Hospital & IVF Center, we are proud to offer a wide range of specialized services. Our oncology hospital is equipped with state-of-the-art facilities, providing advanced cancer care, including chemotherapy, under the guidance of experienced oncologists.

For couples facing challenges with conception, our infertility specialists offer personalized treatment plans to address both male and female infertility issues. We provide hope to families seeking to expand through fertility treatments.

Our gynecological department offers a spectrum of procedures, from vaginal hysterectomy to uterus removal surgery, catering to diverse medical needs. As a leading maternity hospital, we ensure safe and comfortable deliveries, with a team of dedicated professionals and specialized care by breast specialists.

We take pride in our comprehensive surgical services, ranging from uterus cancer surgery, fissure, and appendicitis surgery to hernia repairs, appendix operations, and piles treatments, including laser piles and fistula management. Our skilled general surgeons are adept at handling complex cases, including prostate surgery and other general surgical procedures.

Beyond surgical specialties, we have a team of qualified physicians who provide expert medical consultations and treatments. Our state-of-the-art facilities, including ultrasound scan and sonography services, aid in accurate diagnoses and ensure effective medical management.

Our commitment extends to pediatric and neonatal care, with a focus on providing the best possible medical attention to our youngest patients. Additionally, we offer tuboplasty surgery, total laparoscopy, hysterectomy surgery, laparoscopic myomectomy, and myomectomy procedures performed by experienced

gynecologists.
