Our [Biology Department](#) boasts a variety of technical solutions, professional scientific research teams, various advanced biological instruments and biological laboratories. Medicilon has rich experience in biological fields such as molecular biology, cell biology, in vitro biology, structural biology, among others. With our technical platforms such as enzyme level and cell level measurement platforms, we help our clients select compounds and research their properties, action mechanism and bio-marker analysis, thus ensuring the effective implementation of our clients' projects and helping promote the process of drug R&D.
