Specification: 5,7-dimethoxyflavone 10%

Product Details

Black ginger extract is extracted from black ginger. The appearance is purple-black powder, with different purity and specifications, and is used in health care products for men or women.

Overview:

---

Thai black ginger, also known as *kaempferia parviflora* (KP), is a herb that grows from rhizomes. Depending on the soil conditions, the fresh interior of the tuber may be purple or black. At first, black ginger was used by Mongolian tribes to relieve muscle pain. It can also be used as a sexual stimulant and is said to treat impotence. Black ginger is called Thai ginseng. In Thailand, the properties of Thai black ginger can cause happiness, vitality and balance blood pressure as well as treat dysentery and stomach pain. So Thai black ginger extract is very popular in Thailand.

Benefits of black ginger extract:

Black ginger extract has anti-allergic, anti-inflammatory, anti-mutation, anti-depressant, anti-cholinesterase, anti-microbial and anti-cancer effects, prevents peptic ulcers, protects the heart, and inhibits obesity.

For women, black ginger extract can promote glowing, healthy skin and treat vaginal discharge. It also helps to regulate the menstrual cycle, treat diabetes, reduce fat in blood vessels, and prolong life.

For men, the latest research black ginger extract contains ingredients that can stimulate male androgens to promote male physiological functions. It can promote the relaxation of vascular smooth muscle, thereby increasing the blood circulation of male reproductive function.
