Divine Metal & Alloy is a specific supplier of ASTM A517-grade carbon steel sheets and plates. We can offer ASTM A517-grade pressure vessel steel plates in different thicknesses and sizes at sensible costs. ASTM A517 Grade is either accessible as ex-stock or straightforwardly delivered from the factory to our clients across the globe.

ASTM A517 is the specification covers standard requirements for high-strength quenched and tempered alloy steel plates intended for use in fusion welded boilers and other pressure vessels. The steel shall be killed and shall conform to the fine austenitic grain size requirement. Heat and product analyses shall be conducted wherein the material shall conform to the required chemical composition for carbon, manganese, phosphorus, sulfur, silicon, nickel, chromium, molybdenum, boron, vanadium, titanium, zirconium, copper, and columbium.

Standard Specification Cold 517 gr Plates

Width	1000mm-4500mm
Thickness	5mm-150mm
Length	3000mm-18000mm
Impact tested	-52° C
Material	Pressure Vessel Steel / Boiler Quality
Process of Manufacturing	Hot-Rolled (HR)
