[Huicong Hardware Product](#) is a metal stamping manufacturer. Our custom metal stamping services combine the use of stamping machines, deep-drawing machines, laser cutting, and welding machines, fabrication machines, and all types of processing equipment to provide the most cost effective solution for high volume manufacturing of metal stamping parts. By choosing us at custom metal parts, we can design and build specialized manufacturing cells for custom metal stamping services using automation to achieve high volume, low cost production.

Custom Metal Stamping Products

Huicong Hardware Product ships quality custom metal stamping parts worldwide, providing you with world-class quality assurance and precision stamping technology. Stamping parts in stainless steel, aluminum or other metals requires precision. Our ISO 9001 registered quality system ensures that you get defect-free metal stamping parts with tight tolerances in high volume production.

According to your drawing or sample (size, material, thickness, processing content, and required technology, quantity, etc.)

1. Material: carbon steel, SPCC, SGCC, stainless steel, aluminum, brass, copper, titanium, silicon steel, nickel plate, etc.
2. Processing: laser cutting, precision stamping, bending, CNC punching, thread processing, metal forming, custom CNC processing, riveting, drilling, welding, mold development, etc.
3. Surface treatment: brushing, polishing, anodizing, powder coating, electroplating, screen printing, sandblasting, nickel plating, zinc plating, electrophoretic paint, electrostatic spraying, chrome plating, blackening, pickling and passivation, vibration, coloring, mirror polishing, brush polishing, painting, powder coating.
4. Error: Tolerance range +/-0.02mm
5. Processing equipment.
 - DMG 5-axis CNC machining center/DMG compound CNC machine tool/ Machining Center/ CNC lathe/ Grinder/ Milling machine/ Lathe/ Wire cutting/ Laser cutting/ CNC shearing machine/ CNC bending machine
 - AMADA laser cutting machine/AMADA NCT punching machine/AMADA bending machine/TIG/MIG welding machine

- Spot welding machine, stamping machine, riveting machine
- Stamping tools for processing (CNC milling machine, wire EDM, EDM, grinding machine)

Custom Metal Stamping Process

It starts with design

As a premier metal stamping manufacturer, our commitment to our equipment is evident. Truly transforming standard stamping into metalworking masterpieces is our engineering expertise, and we are pleased to share our world-class quality metrics with you.

Serving the World

Whether you are an engineer starting a project and seeking high-volume, high-value metal stamping capabilities, or a procurement specialist looking for a quality-oriented metal stamping manufacturer, let us quote you on your metal stamping.

Precision metal stampings (tolerance range +/-0.02mm)

We understand that our customers require superior products that meet quality, design and manufacturing specifications. Our company has invested heavily in advanced stamping, bending, and drawing equipment that allows us to deliver the parts you need quickly.

In-house designed and manufactured stamping tools

All stamping tools and dies are manufactured in-house using our advanced machining equipment. With over 20 years of experience in manufacturing metal stamping parts. First and foremost, when I receive an inquiry for a new custom stainless steel sheet metal part, we present the customer with a reasonable solution to ensure that the newly designed part meets the principles of the stamping process as well as is cost-effective.

Material Assurance

Our custom made metal stamping parts are produced from a wide range of materials including cold rolled steel, stainless steel, drawn quality steel, brass, aluminum, copper, corrosion resistant, high strength materials, sheet metal and coil. We manufacture high-quality parts for the agricultural, alternative energy, ATV and marine, automotive, defense, engine components, heavy equipment, furniture, lawn and garden, material handling, power transmission, railroad, and food processing industries.

At Huicong Hardware Product, we provide high-quality custom metal stamping products to many industries,

and we use a high level of engineering in metal stamping parts to manufacture products that meet the highest industry standards.
