Widely used in mining, automotive, oil, gas and other industries with high wear and corrosion, [custom polyurethane bushing](#) is an excellent choice for many applications.

PRODUCT DESCRIPTION

Custom Polyurethane Bushing

Polyurethane bushings have become a common product for many industrial applications. Custom molded polyurethane bushings are widely used in mining, automotive, oil and gas and other industries where high levels of wear and corrosion are prevalent. Designed for versatility, cast polyurethane bushings are fully customizable and well suited for dynamic, high-wear applications. Our bushings can be cast in many different grades of polyurethane and are available in a variety of colors.

Cast custom polyurethane bushings to your specifications

Our custom polyurethane bushings can be manufactured to your specific requirements, so send us your drawings or let our team of engineers work with you to design your solution!

OEM Rear Resistant Polyurethane urethane bushing

Feature: 1. Abrasion-resistant, High rebound, High load capacity 2. Customized size and color are available

Advantage: Wear resistance, Tensile strength, Anti-static, High load capacity, Temperature resistant, Mechanical formulation, Oil resistance, Solvent resistance, Hydrolysis resistance antioxidant

Application: Machine parts, Wheel of clay machine, Sleeve bearing, Conveyor roller, Conveyor belt, Injected seal ring, LCD TV card slots, Soft PU coated rollers, U groove for aluminum, PU screen mesh, Industrial impeller, Mining scraper, Mining water flume, Screen printing squeegee, Car film tools
