Double Head CNC Lathe DNL061/DNL062

Double Head CNC Lathe Description

Both ends of the one clamping are processed at the same time or independently, the compact vertical cutter double head CNC lathe with 100-480 mm turning length is suitable for turning, drilling, tapping and boring of precision shaft parts. Compared with traditional CNC lathe, one is equivalent to the machining efficiency of two machines, and the coaxiality can reach level. High precision, high efficiency, it can carry with truss or joint robot and automatical line.

Technical Parameters

ITEM	DNL061	DNL062
Max Body Rotate Diameter, mm	Ø200	Ø200
Clamping Diameter Scope, mm	Ø15-Ø50	Ø15-Ø50
Turning Length Scope, mm	100-300	300-480
Spindle Clamp Diameter, mm	Ø50	Ø50
X/Z Travel , mm	280/180	280/180

X/Z Fast Speed, m/min	18/24	18/24
-----------------------	-------	-------

Fool Type	cutter	cutter
-----------	--------	--------
