As the nation's largest bulb recycler, Lighting Resources and its EZ on the Earth division are committed to providing quality recycling services to clients. Whether you have truckloads of waste light bulbs or just a bucket of spent batteries, we have a recycling solution that will take care of your wastes, keep you in compliance, and help you manage your environmental commitment. Operating 13 locations throughout the United States with a nationwide truck fleet, and mail-back recycling program, we also recycle electronic scrap, batteries, ballasts, thermostats, tritium exit signs, and smoke detectors. As we continue to grow we are now offering new and innovative products for sale including zero energy maintenance free exit signs, tritium exit signs, photo-luminescent tapes and markings. Call us today and see for yourself. Whether you generate truckloads, pallets, or require a recycle kit, Lighting Resources can service your needs.
