[Fiberglass extendable pole](#), adopt 2-section structure design, with comfortable spongy handle and all kinds of thread like American/Germany/Italy/etc.. Because the thickness of the tube wall has reached 2mm, it has high strength and insulation, so it is widely used in long handle telescopic tools. Its role is multifunctional, people usually use it for extension long reach tools, such as telescopic pole with electric head/light changer/cleaning tools duster/paint roller brush/hooks... It is a durable and very reliable extendable pole. Flip cam locking device can be locked at any height to complete the work. The structural design of the telescoping pole focuses on pursuing simplicity, and all parts are reinforced, so the failure rate of the product is very low.

PRODUCT FEATURES

Strong, Heavy duty, flexible, durable, extendable, insulation
