[Fitterfly](#) is an award-winning, clinically-proven, health-tech company working in the field of Digital Therapeutics (DTx); with published outcomes in research publications worldwide. Our product suite offers scientific and personalised Digital Therapeutics programs to manage several health conditions such as diabetes, and obesity. Designed to complement your Doctor's medical therapy, Fitterfly DTx programs offer personalised guidance and motivation on nutrition, exercise, stress, weight and sleep management. With a unique combination of human and technological interventions, the Fitterfly DTx programs help people with various conditions improve their health from the comforts of their home.

Check out our programs below:

Diabefly Pro: Diabefly is a digital therapeutics program that is trusted by Doctors and people across India.

Diabefly Reverse a unique Diabetes reversal program created by Endocrinologists, Nutritionists, Psychologists, Physiotherapists and technology experts

Reset23: Lose weight in a healthy and sustainable way with a scientific weight loss program- specially designed for stubborn weight by senior nutritionists, physiotherapists, psychologists and behaviour change specialists.
