Intellectual property (IP) is intentionally our only focus. Our firm was built with your needs in mind. We exist to help you multiply the value of your ideas. We do this through a simplified process, experienced guidance, boutique-style service, and simple flat-fee pricing structure. From software patents to product trademarks, we have the experience to protect your valuable ideas. We've specialized in patent law for more than 25 years — resulting in more than 2,000 patents. We've helped our clients create products that have sold in major national retailers, including Amazon, Target and Urban Outfitters.
