Evergreen Solar Solutions LLC specializes in custom residential solar installations designed to reduce energy bills and carbon footprints. Serving Portland and the Pacific Northwest, our certified technicians conduct thorough home energy audits to determine optimal panel placement, system size, and battery storage needs. We install monocrystalline and bifacial panels from top-tier brands like SunPower and LG, ensuring maximum efficiency in Oregon’s variable climate. Our process includes roof assessments, permitting assistance, and integration with existing electrical systems. Financing options, including zero-down leases and federal tax credit guidance, make solar accessible for all budgets. Post-installation, we provide real-time monitoring apps to track energy production and savings. With 25-year performance warranties and 24/7 maintenance support, we guarantee seamless adoption of clean energy.
