Hashcodex provides a complete CRM solution designed for Forex brokers. The platform helps manage leads, clients, KYC processes, support tickets, compliance, and affiliate programs. Everything is handled from one simple dashboard.

It includes a secure client portal where users can register, upload documents, make deposits and withdrawals, and track trading activity. Hashcodex supports integration with MT4, MT5, and payment systems.
This CRM is ideal for Forex brokers, trading platforms, and financial companies that want to manage their operations from one place.

Key Features:

Lead and client management
KYC and onboarding tools
Customer support ticket system
Compliance tracking
Affiliate program tools
Integration with MT4 and MT5
Payment system support
Branded client portal
Strong data security
