IntelliChief provides a software platform for AI-enabled automation and expert best-practice consulting to robotically capture unstructured data from complex business documents, as well as validate, enrich, enter and process this data into enterprise-class ERP systems. By seamlessly integrating with leading ERPs, IntelliChief has the power to reengineer mission-critical business processes and functions to help organizations optimize and streamline their operations. From accounts payable and accounts receivable to sales order management, human resources and more, IntelliChief enhances efficiency by eliminating manual labor and administrative errors to empower organizations of all sizes to standardize on an automation platform and cost-effectively scale in an increasingly digital world.
