One of the major downsides of keeping up with the latest news reports on Coronavirus is the dilemma that lurks in one's mind- is it safe to travel amid the epidemic? Especially when you have an important business meeting to attend to overseas.

Since late December 2019, Coronavirus has managed to spread over 79 countries and claimed more than 3000 lives. Rate of infection has crossed over 1 lakh people and still counting. These are unfortunate times to live in. We can not keep on blaming the Wuhan government forever for not implementing timely actions to contain the virus. The best we can do in the present circumstances is to protect ourselves by adopting the best preventive measures. For more visit :-
