iTG Software Engineering India (P) Ltd. incorporated in 2003 in India was started with a goal set of providing high end telecom solutions, and out of box software products, IT services for a variety of industry verticals. In additions to above iTG started a new vertical to serve Indian industry for their Automaton requirement by joining hands with Advantech a leader in Industrial Automation Products Manufacturing. Our motive is to provide value for money services. The prospects turned to clients and then client and vendor relationships turned to technology partnerships with all technical jobs outsourced to us and truly the credit goes to our efficient Team which helped us in writing these success stories.
