At [RED STAR Security](#) Services we offer a convenient and simple key holding service. Utilizing a unique key control system, we secure our clients' keys on site using a highly secured storage vault with the capacity to hold multiple keys. If an alarm was to sound, this procedure has proven to be more effective and increase response times. Our highly trained security guards will then complete a full foot patrol and conveniently access the storage vault by using a master PIN and key.

OPTIMIZED ACCESS CONTROL FOR EFFICIENCY AND SECURITY

Public access points can quickly become bottlenecks, while restricted points need security protocols to ensure that only authorized personnel can access them.

Whether you are looking to control people and vehicles' access to specific areas during an event or safeguard your airport, we possess the access control expertise and the staff resources to cover all of [your security needs](#).
