Kings Sidewalk Shed & Scaffolding create scaffolding that are strong, stable, and durable to support the weight of workmen and construction materials as well. We ensure the safety of workmen by creating non-slippery and durable scaffolding in Bronx, Brooklyn, Manhattan and Queen. Our sidewalk sheds will be constructed and designed properly according to NYC rules and regulation. We will ensure that they have strong and durable structural support. The safety and wellbeing of the pedestrians is our priority while constructing these sheds. By choosing us you can get your work done without causing damage to your bank account as we charge a reasonable and affordable amount for our projects without burdening our customers in NYC.
