The integration of advanced technologies makes Rummy games more exciting for new players and enhances the experience for seasoned enthusiasts. As a leading [Rummy game development company](#), KPIS Pvt. Ltd. specializes in creating high-quality Rummy games using AI, ML, Blockchain, and AR/VR to ensure secure, immersive, and fun gaming experiences.

Here are some popular types of Rummy games we develop:

- **Points Rummy-** A fast-paced game where players compete for points, each having a fixed value. The winner takes the total accumulated points.
- **Pool Rummy-** Players aim to stay under a pre-set point limit (101 or 201) to remain in the game, making it highly strategic.
- **Deals Rummy-** A set number of rounds (deals) are played, and the player with the highest chip count at the end wins. Ideal for structured gameplay.
- **Paplu Rummy-** This version includes joker cards and complex rules, adding extra excitement and challenge.
- **21 Card Rummy-** Played with three decks, this format includes value cards and requires strong strategic skills.
- **Blind Rummy-** Players start with face-down cards, adding a thrilling element of surprise to the game.
- **10 Card Rummy-** A short and fast-paced version where each player gets only 10 cards, making it perfect for quick gaming sessions.
- **Indian Rummy-** A popular 13-card game in India, now enhanced with AI, Blockchain security, and AR for a modern, interactive experience.

At KPIS, we focus on innovation and use the latest technologies to develop visually appealing, reliable, and scalable Rummy games. Our expert developers ensure smooth performance by thoroughly testing the software to deliver a bug-free gaming experience. If you're looking for top-notch [Rummy game developers](#), KPIS is the right choice!
