LockDown Surgical Inc. provides clinically proven solutions that support rapid, reliable recovery for soft tissue reconstruction procedures. They specialize in advanced devices for acromioclavicular (AC) joint stabilization, offering surgeons a trusted option for coracoclavicular ligament repair. Their flagship product, the LockDown Shoulder Stabilization System (LSSS™), is a double-braided augmentation device designed to provide strong fixation while preserving natural movement. The LSSS™ is FDA-approved and widely used by orthopedic surgeons across the United States. LockDown Surgical Inc. is committed to delivering high-quality surgical solutions backed by extensive clinical experience and expert in-theater support.
