Males often feel uncomfortable in going shirtless because of the swollen chest appearance. Aestiva Clinic provides the best [Gynecomastia Surgeon in Delhi](#) and helps them achieve a masculine chest profile by removing excess fat and glandular tissue from the male chest. The enlarged male breast is caused by hormonal imbalance, weight gain, aging, obesity, steroid consumption, intake of junk food, thyroid problems, and liver disease. Gynecomastia symptoms include excess skin or hanging appearance of the chest, pain and pus secretion, and slight puffiness in the chest area.
