Nascent Pipe & Tubes is one of the well-established stockiest and manufacturer houses of quality Nickel Alloy 201 Fasteners (Screws), which is a low carbon modification of the Nickel 200. Our Nickel 201 Hex Head Screws is generally specified where exposure to temperatures above 600 Degree F is expected.

Nickel 201 Socket Head Cap Screws has a low annealed hardness and very low work – hardening rate, where it's thermal and magnetic properties are also similar. Those who use Nickel 201 Socket Set Screws find it desirable in deep drawing, spinning, and coining. Nickel 201 Anchore Screws is not subject to embrittlement at temperatures of 600 Degree F – 1400 Degree F due to its low Carbon.
