Nascent Pipe & Tubes is one of the well-established whole seller and trader of quality Nickel Alloy 201 Fasteners (Washers), which is available in different sizes and shapes for our customers. Most nickel – containing products such as Nickel 201 Flat Washers have long useful lives, where average life is probably 25 years – 35 years, with many applications lasting much longer.

Nickel 201 Lock Washers is silvery white and takes on a high polish, where it also further gives glass a greenish colour. Nickel 201 Sealing Washer is hard, malleable, ductile, somewhat ferromagnetic, and a fair conductor of heat and electricity. Nickel 201 Split Washers belongs to the iron – cobalt group of metals and is chiefly valuable for the alloys it forms.
