Medicilon's Pharmacology department functions in accordance with the needs of our customers for a variety of effective animal models used to detect drug effectiveness. We offer non-human primates, dogs, mice and rats, rabbits, guinea pigs and others in our services. At present, we have various proven effective animal models. Furthermore, our experienced staffs operate with strong theoretical basis. We offer the services which are flexible for custom development of various types of models to meet the requirements of our clients.
