Sanicro 28 Pipes and Tubes are one of the best alloy products, having outstanding resistance to corrosion in extreme conditions of atmosphere. Manufacturer, Supplier, Stockist, and Exporter, Reliable Steel Distributors proudly proffer these Sanicro 28 products in high quality to meet the demands of industries with various applications. This multi-purpose, high-alloy austenitic stainless steel finds its major application in those industries that need to tackle aggressive corrosive environments, such as oil and gas, chemical processing, and marine engineering.

Sanicro 28 is comprised of chromium, nickel, and molybdenum elements, hence possessing excellent resistance to general corrosion conditions and attacks from localized corrosion. It is also highly resistant in solutions containing chloride and acids for good protection during the worst working conditions. At Reliable Steel Distributors, we manufacture Sanicro 28 pipes and tubes to a specific specification for utmost mechanical properties together with long life in a vital application.
