Select Reman Exchange is a trusted corporation located in South Bend, IN. We supply customers worldwide with cost-effective solutions for their Diesel Engine and parts needs. We remanufacture all makes and models of diesel engines in the On-highway, Industrial, Marine and Agricultural industries. We also utilize our global network of parts suppliers to help ensure you find the correct parts you are looking for. We can ship any of your engines and parts needs worldwide.

At Select Reman Exchange our technicians take pride in their workmanship and product quality. We employ technicians who are equipped with skills gleaned from years of experience in the industry. We use a 1 technician per engine process, where they are responsible for that engine from the tear-down phase to the final assembly and test run phases. Our technicians remanufacture our engines by methodically disassembling, cleaning and inspecting every component of the engine, from the bare block on, before they meticulously assemble the engine. We do not reuse any internal core components that have not been thoroughly inspected and machined back to OEM specifications. We use trusted engine part manufacturers to supply us with All New piston and liner assemblies, bearings, gaskets and seals to remanufacture your engine. We Refuse to cut corners and sell a substandard product.
