JX shot blasting equipment (<https://www.shot-blasting-machinery.com/>) portfolio consists of roller conveyor(through conveyor) shot blasting machine, linear motion shot blasting machine, hanger (hook type) shot blasting machine, rotary table shot blasting machine, tumble belt shot blasting machine, wire mesh belt shot blasting machine, etc.

JX shot blasting machines have a wide range of application in automobile industries, casting industries, steel structural industries, shipping industries, stone industries, etc. However, JX Blast also manufactures special machine designs like crankshaft and engine block blast machines, which meet all technical requirements for surface treatment in modern foundries, and are easily adapted to the individual customer's specifications. These blast systems are specifically designed for desanding, descaling, deflashing and deburring of castings or heat treated components.
