

Solutions & Production Line

Address	1866 meters down yellow river highway bridge, Changqing district
Contact Person	April Zhang
Mobile Number	1306403773
Email	yanmeiz087@gmail.com

In the manufacturing process of food industry, our sophisticated unique technology is realized through specialized equipment used at all stages of the connected process, from feeding, extrusion, heat treatment, cooling, separation, homogenization, molding, storage, transportation, packaging, to complete material handling systems. Our extensive experience in product system engineering supports the development of all our equipment and key components. From the beginning of your ideas to the realization of all ideas, our clients benefit from a process that is completely tailored to their specific needs. In keeping with our commitment to our customers, we ensure the long-term high performance of our products through the final customers' consultation and support.

Equipment Characteristics

Together with domestic and foreign counterparts, we will contribute to the development of the world food industry to create a better world

1. Batch production to ensure a short lead time
 2. Meet with the food security standards
 3. Intelligent control to ensure high efficiency, security and efficient production
 4. Simply by changing the process equipment can change the production process requirements
-

-
5. Save resources to the maximum extent possible
 6. Comprehensive process engineering support
 7. Flexible solutions for control systems
 8. High reliability and mature technology of the equipment
 9. We can upgrade your existing product line and you can customize value-added services
