Throughout the course of your life, different things can gradually stain your teeth. It's through no fault of your own, you may brush regularly, but things like caffeine and chocolate and even ageing can lead to staining. This gives your teeth a yellowish appearance, which can damage your confidence and make you afraid to smile.

With our teeth whitening service, we offer a simple procedure that can remove stains and brighten your teeth. Come to our surgery and we will custom-fit you with some special whitening trays that fit comfortably in your mouth. These are paired with Whitening gel to offer an at-home teeth whitening experience. Our dentists will explain precisely how you use the products, and you're free to whiten your teeth at home!
