[47Billion](http://www.47billion.com) is a product engineering services company specializing in Big Data Engineering and Visualization, UX/UI Design, Machine Learning. We have strong technical expertise in building highly scalable analytics on multiple cloud service providers. We have developed analytics-based products in the telecom, logistics, agriculture, ad-tech, tourism, education, healthcare, IoT, and digital signages/kiosks industries. We also specialize in user experience/design. Our team of visual designers has experience developing user-friendly interfaces by following methodical processes of information architecture, user journeys, wireframes and high-fidelity mockups. We have designed user interfaces for the transportation, agriculture, and retail industries as well as various enterprise apps and websites. If you are looking for a reliable partner to develop your product, Visit www.47billion.com
