Treadmill Doctor is now the largest full-line [fitness equipment services](#) company in the United States. We've been Included in Inc. MagaZine's list of fastest growing companies, in the US for many years, and featured by publications including Runner's World, Cooking Light, and Health & Fitness News.

History Established in 1998.

Let's set the record straight: we're not actually doctors, much as our mom would love to brag otherwise. We're two brothers from Olive Branch, MS, who have an MBA, an MDiv, and a Master's in Political Science between us... but no MD. Over the years we've certainly earned our specialties in "elliptretics" and "treadmllology" - and Clark really did start out by using a stethoscope to diagnose faults with treadmills (hence the company name). And it is no longer just the two of us: today we're a team of 32 fitness-equipment enthusiasts - all devoting our lives to keeping your machines in peak condition. Every day, hundreds of people reach out to let us know what's going on with their machines - both good and bad. Daily, our repairmen see for the machines that always go wrong in the same spots. We sell thousands of repair parts every month to consumers, gyms, hotels and other users worldwide.
