[Verasys Technologies Private Limited](#), incorporated on August 24, 2016, under the Companies Act, 2013, stands as one of the recognized companies for providing digital signature certificates and related services. With the Government of India driving 'Digital India', we do not see the demand for digital signatures and electronic signatures coming down in the next few years. Some of the examples include Income Tax Return filings, MCA, PF, GST, etc. We issue digital signatures based on Aadhaar e-KYC making the entire process of obtaining a DSC quick and paperless. Practically, we can issue a DSC within minutes versus the traditional way of making a paper application and providing certified documents. We have a dedicated team of professionals, who understand the domain, government rules and regulations as well as the specific business needs and provide the best eSign or electronic signature related services. Our company, a subsidiary of Alankit, is the 8th Certified Authority (CA) to have received the DSC license by the CCA (Control and Certifying Authority).
