Wholesale Paint Brushes

Qianmiao offers a full line of wholesale paint brushes, including wall paint brushes, angled paintbrushes, and round paintbrushes. depending on the task at hand, these brushes can be used for painting, gluing, or oil and chip brushes.

Our [paint brushes](#) come with either pure bristle bristles or synthetic bristles to carry any material - all made with tough epoxy resins that resist the most aggressive solvents. Our better-quality brushes have thicker bristle areas to hold more fluid and sharper cut tips for greater precision. These brushes are the choice when bristle loss is less tolerable. The handle is designed to be easier to grip and stand up to repeated use.

Chinese hog bristle is a natural hog bristle that is suitable for many different applications but is particularly suitable for oil-based paints, stains, varnishes, polyurethanes and varnishes. This is due to the soft, flexible nature of the bristles, the way the bristles hold the material used, and the natural slope that produces a smooth surface. Synthetic bristles can be used with oil-based or water-based products.

Baoding Qianmiao Daily Necessities Technology Co., Ltd. specializes in the production of paintbrushes and various paint tools, with a number of R & D and design personnel, which can meet any needs of different customers. Our products have excellent performance and low price and are widely sold to all markets around the world.

Our full line of paint brushes is available for high volume needs at all price points, from inexpensive disposable brushes to the highest quality varnishes and brushes. Also, ask about our volume discounts on commercial paintbrushes.
