Train trips are always fun, but you get worried sometimes when your train ticket is not confirmed. Life seems to be much easier and flexible with the advent of an online train enquiry system through which we can get any information regarding our train on fingertips.

### Why I should check PNR status?

If you have booked your ticket and unfortunately you have got a waiting list ticket, then you need to [check PNR Status live](#) regularly to know the updated status and information about your ticket. If other travelers cancel their voyage, the PNR status for the waiting list or RAC passengers may shift to confirm in the future. So, checking [PNR status](#) online will help you to know whether your train ticket has got confirmed or is still on RAC, or on a waiting list.
