The gas-liquid [ball valve](#) is designed and manufactured according to API 6D standards, with inspection and testing also adhering to API 6D. The valve features end flanges conforming to ASME B16.5, face-to-face dimensions per API 6D, and pressure-temperature ratings as per ASME B16.34. It is designed to operate within temperatures ranging from -29 to 150 and is available in nominal diameters from 2 to 24 inches, with design standards ranging from Class 150 to 2500 LB. The product range includes body materials such as carbon steel, stainless steel, and alloy steel, with sizes ranging from 2 to 60 inches (DN50-DN1500). End connections include BW and flanged, with pressure ratings from 150 to 2500 LB (PN16-PN420). The valve can be operated via lever, gearbox, electric, pneumatic, electro-hydraulic actuator, or gas-over-oil actuator, and is suitable for working temperatures between -46 and +200.
