Other Details:

1) Introduction to IETM |History of IETM | what is IETM?

- Technical manuals (e.g. maintenance, user, training, operations, etc) published in electronic format are becoming more and more popular than paper based manuals for their interactivity, convenience and ease of use.
- For example, the maintenance and operation manuals of a warship, which used to occupy 300 -350 sq. feet of prime area with thousands of pages of technical literature
- It was very difficult to refer some operating process or trouble shooting from thousands of hardcopies. Each time, maintainers had to refer multiple books to get information related to issues.
- To address these issues, IETMs were introduced in ships initially. IETM is the replacement of paperwork / hard copies
- IETMs are now replaced by their electronic versions occupying very little space and can be viewed on tablets from any part of the ship. These electronic technical manuals are termed as Interactive Electronic Technical Manuals (IETM) or Interactive Electronic Technical Publications (IETP).
- Interactive Electronic Technical Manuals (IETMs) or Interactive Electronic Technical Publications (IETPs) are technical manuals (such as maintenance, training, user or operations manuals) usually authored in XML or HTML -5
- IETMs are a portable, electronic "library" which contain thousands of pages of documentation and images and allows end users to trace technical documentation in a more efficient manner, and the digital nature provides a more agile and accurate method of updating technical documentation.
